INTRODUCTION

Compiled in this manual are the operating and maintenance instructions for the INTERNATIONAL 434 Tractor.

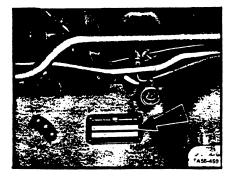

This material has been prepared in detail to help the operator to understand better the correct care and efficient operation of the tractor.

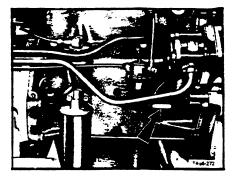

If information not given in this manual is required, consult an International Harvester dealer. Dealers are kept informed on the latest methods of servicing machines, they carry stocks of genuine I.H. service parts and are backed in every way by the full facilities of the International Harvester Company.

Throughout this manual the terms LEFT, RIGHT, FRONT and REAR are to be taken as those applicable to a person seated in the driver's seat and facing the radiator.

When in need of service parts always specify the tractor and engine serial number. The tractor serial number is stamped on a nameplate attached to the right hand side of the clutch housing (Illust.5). The engine serial number is stamped on the right hand side of the engine crankcase (Illust.6). For ready reference, write these serial numbers in the spaces provided above the illustrations.
