Tractor

Part number 48155299

1st edition English

October 2017

Replaces part number 48052452

Contents

1 GENERAL INFORMATION

Note to the owner.....	1-1
Product Identification	1-3
Engine identification	1-4
Component identification - Transmission	1-4
Cab identification	1-5
Universal symbols	1-6

2 SAFETY INFORMATION

Safety Precautions.....	2-1
Roll Over Protection Structure (ROPS)	2-2
Safety Decals.....	2-3
Noise level	2-14
Before operating the machine	2-15
Driving the vehicle	2-15
Operating the machine	2-16
Power take off (PTO) operation	2-17
Servicing safety precautions	2-18
Operating the external controls.....	2-19
Fire or explosion prevention	2-20
Diesel fuel	2-21
Personal safety offered by the machine	2-22
Intended use statement	2-24
Ecology and the environment	2-26

3 CONTROLS AND INSTRUMENTS

Access to operator's platform

Introduction	3-1
External rear view mirrors	3-3
Cab	3-4
In cab storage (where applicable).....	3-5
Cable and wiring routing.....	3-5
Mobile telephone usage	3-5
Implement monitor installation.....	3-6

Operator's seat

Operator seat	3-7
Shoulder belt	3-8

Instructional seat

Instructor's seat (when fitted)	3-9
---------------------------------------	-----

Forward controls

Ignition key	3-9
--------------------	-----

Warning lights	3-10
Left-hand control lever.....	3-10
Follow me home lights	3-11
Right-hand control lever	3-11
Control levers forward and reverse	3-12
Clutch pedal	3-12
Foot throttle pedal	3-13
Brake pedals - Service brake	3-13
Steering column	3-14

Left-hand side controls

Parking brake.....	3-15
--------------------	------

Right-hand side controls

Switches	3-16
Hand throttle.....	3-17

Rearward controls

Switches on C-pillar	3-17
----------------------------	------

Overhead controls

Overhead controls.....	3-17
Interior lights.....	3-18
Heating, Ventilation, Air-Conditioning (HVAC) controls.....	3-19
Manual temperature control	3-21

INSTRUMENT CLUSTER

Instrument panel.....	3-22
Gauges	3-22
Instrument cluster panel.....	3-23
Gauges	3-25
Keypad enhanced	3-27
Selecting or changing the display settings	3-29
Instrument cluster Analog-Digital Instrument Cluster (ADIC) - Adjust.....	3-30
Performance monitor	3-33
Alarm functions	3-41
Accessing stored error codes	3-43
Warning and advisory symbols	3-44
Color monitor (where fitted)	3-50
Pop-up screens on color display	3-51
Performance monitor on color display	3-56
Display configuration – Implement width	3-59

4 OPERATING INSTRUCTIONS

Commissioning the unit

Fueling the machine	4-1
---------------------------	-----

Starting the unit

Starting the engine	4-2
Cold starting aids	4-3
Booster battery procedure	4-4

Stopping the unit

Stopping the engine	4-5
Auto engine shutdown	4-5
Engine automatic shutdown with enhanced keypad (where fitted)	4-6

5 TRANSPORT OPERATIONS

Preparing for road transport

Carrying the tractor on a transporter	5-1
---	-----

Recovery transport

Machine towing	5-1
----------------------	-----

6 WORKING OPERATIONS

General information

Variable engine power management	6-1
Engine speed management	6-2
Differential lock system	6-5
Four wheel drive	6-7
AUTOMATED HEADLAND FUNCTIONS	6-8
Record and replay	6-8
Recording a sequence	6-10
Playing a sequence	6-12
Quick guide	6-14
Explanation of symbols	6-16

TRANSMISSION

General description	6-17
Transmission operation	6-17
Driving the tractor	6-18
Reverse alarm	6-20
Speed matching – Speed correspondence	6-20
Ground speed chart	6-20
Autoshift function	6-23
Auto shifting field mode	6-24
Autoshift function – Autoshift function gear shift sensitivity	6-27
Auto shifting in road mode	6-28
Programming reverse gear ratio	6-30
Setting the sharp shuttle function	6-32
Creeper gears (where fitted)	6-33
Fault codes	6-34

REAR POWER TAKE-OFF

Power Take-Off (PTO) operating precautions	6-35
Power Take-Off (PTO) connection.....	6-35
Power take off (PTO) operation	6-37
Power take off (PTO) operation Two Speed	6-41
Auto Power Take-Off (PTO) operation.....	6-42
Power Take-Off (PTO) – (PTO) Brake	6-43

REAR HITCH

Electronic Draft Control (EDC)	6-44
Colour display screens – Adjusting the hydraulic lift	6-48
Front hydraulic lift with electronic control	6-50
Operation – Electronic draft controller	6-50
Colour display screens – Adjusting the slip limit	6-54
Operating the external controls.....	6-54

HYDRAULIC REMOTE CONTROL VALVES

Hydraulic remote control valves	6-57
Rear remote valve configuration	6-57
Operating continuous flow hydraulic equipment.....	6-58
Operating single-acting hydraulic cylinders	6-60
Operating double-acting hydraulic cylinders	6-61
Remote control valves - Configure Motor kit	6-62
Hydraulic oil free-flow return.....	6-63
Hydraulic oil level when using remote hydraulic equipment.....	6-64

THREE POINT HITCH

Attach the implement on the hydraulic lift	6-66
Adjustments – Lift arm	6-68
Quick hitch.....	6-69
Setups - Third point arm	6-71

DRAWBARS AND TOWING ATTACHMENTS

Maximum permitted loads on drawbar	6-73
Tractor drawbar.....	6-75

PNEUMATIC TRAILER BRAKES

Pneumatic trailer brake.....	6-77
Auxiliary air supply connector (where fitted).....	6-80

WHEEL TRACK ADJUSTMENT

Front wheel track adjustment.....	6-80
Front wheel alignment	6-83
Steering stops	6-84
Front axle oscillation stops	6-86
Adjustment of the dynamic front mudguards.....	6-87

Front axle with extension (Cane cultivator) - If equipped	6-90
Rear axle flange type (where fitted)	6-91
Rear axle bar type (where fitted)	6-95
Dual rear wheels (where fitted).....	6-99

BALLASTING AND TIRES

Tire care – Wheels	6-100
Ballasting and tires	6-102
Tires - Compatibility table	6-104
Iron weights (where fitted)	6-106
Liquid ballast	6-108
Tires - Inflation	6-112
Tire pressures and permissible loads	6-113

AUXILIARY POWER CONNECTIONS

Diagnose socket.....	6-115
Auxiliary electrical outlet.....	6-115
Internal power connectors	6-116
External power connectors	6-118

7 MAINTENANCE

General information

Introduction	7-1
Fuel handling precautions	7-2
Diesel fuel	7-4
Specifications - Biodiesel fuel	7-5
Organic Acid Technology (OAT) coolant.....	7-7
Protective devices	7-8

Maintenance planning

Maintenance chart.....	7-10
------------------------	------

WHEN THE WARNING LAMP LIGHTS

Engine air filter, primary	7-12
Brake fluid level.....	7-14
Drain the fuel system water separator.....	7-15

EVERY 10 HOURS OR DAILY SERVICE

Engine coolant.....	7-16
Engine oil level	7-17
Pre-fuel filter	7-18
Pneumatic brake reservoir (when fitted)	7-19

First 10 hours

Wheel nuts tightening torque	7-20
------------------------------------	------

FIRST 50 HOURS

Initial 50 hours	7-21
------------------------	------

EVERY 50 HOURS

Cab air filters	7-22
Cab recirculation air filter	7-23
Cleaning the radiators	7-24
Lubrication points.....	7-25
Check the tire pressures and the tire condition.....	7-27
Battery maintenance	7-27
Windshield wiper fluid reservoir	7-27

First 300 hours

Accumulator - Check	7-28
---------------------------	------

EVERY 300 HOURS

Engine belt	7-29
Pneumatic brake compressor belt (when fitted)	7-29
A/C compressor belt.....	7-29
Change the fuel filter element	7-30
Park brake	7-32
Rear axle oil level.....	7-32
Front axle (4WD) oil level.....	7-33
Front axle extensions oil level – Cane harvester (when available)	7-33
Cab and safety frame mounting hardware torque - Check	7-34
Cab air filters – Activated charcoal filter – (when equipped)	7-35
Front axle hub oil (4WD) - oil level	7-36
Wheels - Check.....	7-37

First 600 hours

Accumulator - Check	7-38
---------------------------	------

EVERY 600 HOURS

Engine oil and filter	7-38
Check the air intake connections.....	7-40
Check the transmission oil cooler pipe couplings	7-41
Fuel injection system	7-41
Change the charge pump oil filter	7-42
Front axle hub - Change fluid.....	7-43
Grease the rear axle shaft bearing	7-43
Wheel nuts tightening torque	7-43

EVERY 1200 HOURS OR ANNUALLY

Engine air filter - Outer element	7-45
Engine air filter - Inner element.....	7-45
Cab air filters	7-46
Cab recirculation air filter	7-47

Pneumatic brake system dryer – Changing the filter (when equipped)	7-48
Change hydraulic system oil	7-49
Change front axle oil	7-50
Front axle extensions oil change – Cane harvester (when equipped)	7-50
Hydraulic oil filter	7-51
Autopilot valve filter	7-53
Change the engine breather filter	7-54
Engine valve clearance	7-55
Accumulators	7-55

EVERY 4000 HOURS OR 4 YEARS

Engine coolant replace	7-57
------------------------------	------

GENERAL MAINTENANCE

Remote couplers oil recovery bottle	7-61
Air conditioning filter drier	7-61
Air conditioning - Charging	7-62
Cleaning the tractor	7-62
Bleeding the fuel injection system	7-64
Service brakes	7-65
Adjust the cab suspension (where fitted)	7-66
Headlight and worklamp adjustment	7-67
Replacing bulbs	7-68
Fuses and relays	7-72
Battery replacement	7-77

Storage

Storing the machine	7-78
Preparation for use after storage	7-79

8 TROUBLESHOOTING

Fault code resolution

Introduction	8-1
--------------------	-----

Alarm(s)

Fault codes and symbols	8-2
Fault codes - Performance monitor	8-3

Symptom(s)

Engine	8-5
Drive	8-7
Hydraulics	8-8
Hydraulic lift with electronic control – Hydraulic lift	8-9
Brakes	8-10
Cab	8-10
Electrical	8-11

9 SPECIFICATIONS

Overall Dimensions.....	9-1
Machine weights.....	9-4
Fluids and lubricants	9-6
Motor	9-8
Drive	9-9
Hydraulics	9-10
Hydraulic lift with electronic control.....	9-11
Brakes	9-11
Driving	9-12
Power Take-Off (PTO).....	9-12
Power Take-Off (PTO).....	9-12
Electrical.....	9-12

10 ACCESSORIES

Pneumatic trailer brake.....	10-1
Rotary beacon (option)	10-3

1 - GENERAL INFORMATION

Note to the owner

GENERAL INFORMATION

This Manual has been prepared to assist you in the correct procedure for running-in, driving and operating and for the maintenance of your new machine. Read this manual carefully. Your machine is designed to be used in normal and customary agricultural applications.

If you require technical support for your machine at any time, do not hesitate in contacting your NEW HOLLAND dealer. They have company trained personnel, genuine parts and the necessary equipment to carry out all your service requirements.

The specification are provided for your information and guidance. For further information concerning your tractor and equipment, consult your NEW HOLLAND dealer.

All data given in this book is subject to production variations. Dimensions and weights are approximate. The illustrations do not necessarily show tractors in standard condition or imply that these features are available in all countries. For exact information about any particular tractor, please consult your NEW HOLLAND dealer.

Your tractor has been designed and built to give maximum performance, economy and ease of operation under a wide variety of operating conditions. Prior to delivery, the tractor was carefully inspected, both at the factory and by your NEW HOLLAND dealer to ensure that it reaches you in optimum condition. To maintain this condition and ensure trouble-free operation, it is important that the routine services, as specified in the Maintenance Graphic of this Manual, are carried out at the recommended intervals.

OPERATORS MANUAL STORAGE

The Operator's Manual supplied with your tractor is an important source of information and should be stored safely.

The manual is written specifically for your tractor so it is important that you make a note of the print number and issue date which can be found on the cover. In the event the manual is lost or damaged it can be replaced with the correct version.

A storage pocket for the Operator's Manual can be found on the rear of the seat. The manual should be kept in this pocket at all times when not in use.

ABOUT THIS MANUAL

This manual gives information for use of your machine, as intended and under the conditions foreseen by the manufacturer during normal operation and routine service and maintenance.

Read and understand; keep it in good condition and always safely store it in the provided pocket in the back of your seat for later easy use.

This manual does not contain all the information related to periodical service, converting and repairs to be carried out by NEW HOLLAND professional service personnel.

The Table of Contents page(s) are provided to have an overview of main manual's topics. A detailed alphabetic index is available at the end of this manual for locating specific items.

Normal operation

- Normal operation means the use of the tractor for the purpose intended by the manufacturer by an operator familiar with the tractor and the mounted or towed equipment and complying with the information for operation and safe practices, as specified by the manufacturer in this manual and by the decals on the tractor and the equipment.
- Normal operation includes the preparation and storage of the tractor, swinging components into work position and vice versa, adding or removing ballast and picking up and setting off attachments.
- Normal operation includes the adjustment and setting of the tractor and equipment, for the specific condition of the field and/ or the crop.

Routine service

- Routine service and maintenance means activities that must be done daily by an operator familiar with the tractor characteristics and complying with the information for routine service and safe practices, as specified by the manufacturer in this manual and by decals on the tractor, in order to maintain its proper function. Routine service includes activities such as fuelling, cleaning, washing, topping up fluid levels, greasing, and replacing consumable articles such as lamp bulbs.

Converting, periodical service and repair

- Periodical service means activities that must be done at defined intervals by trained personnel familiar with the tractor characteristics and which are complying with the information for periodical service and safe practices, as partly specified by the manufacturer in this manual and in other Company literature, in order to maintain the expected life time of the tractor.
- Converting means activities that must be done by professional service personnel familiar with the tractor characteristics and complying with the information for converting, as partly specified by the manufacturer in

this manual, in assembly instructions or in other Company literature, in order to fit the tractor to a specific configuration.

- Repair means activities that must be done by professional service personnel only who are familiar with the tractor characteristics and complying with the information for repair, as specified by the manufacturer in the NEW HOLLAND dealer's Service Manual, in order to restore the proper function of the tractor after a failure or reduction in performance.

CLEANING THE TRACTOR

Your tractor is a state-of-the-art machine with sophisticated, electronic controls. This should be taken into consideration when cleaning the tractor, particularly if using a high pressure washer. Even though every precaution has been taken to preserve electronic components and connections, the pressure generated by some of these machines is such that complete protection against water ingress cannot be guaranteed.

When using a high pressure washer, do not stand too close to the tractor and avoid directing the jet at electronic components, electrical connections, breathers, seals, filler caps, etc. Never direct a cold water jet at a hot engine or exhaust.

Failure to comply with these rules will render the warranty null and void.

Security

The pages in Section 2 list the precautions to be observed to ensure your safety and the safety of others. Read the safety precautions and follow the advice offered before operating the tractor.

SERVICE PARTS

It should be pointed out that genuine parts have been examined and approved by the Company. The installation

and/or usage of 'non-genuine' products could have negative effects upon the design characteristics of your tractor and thereby affect its safety. The Company is not liable for any damage caused by the use of 'non-genuine' parts and accessories. Only genuine replacement parts should be used. The use of non-genuine parts may invalidate legal approvals associated with this product.

It is prohibited to carry out any modifications to the tractor unless specifically authorised, in writing, by the After Sales Service department of the Company.

WARRANTY

Your tractor is warranted according to legal rights in your country and the contractual agreement with the selling dealer. No warranty shall, however, apply if the tractor has not been used, adjusted and maintained according to the instructions given in the Operator's Manual.

Check the mandatory services for your machine in the Warranty Booklet. The Warranty Booklet is issued with the machine.

USE OF BIODIESEL FUELS

NOTICE: Before using Biodiesel fuels in your tractor, refer to the information on page 7-4 regarding the storage and use of Bio diesel fuels.

Tampering with the engine or fuel system

ATTENTION: Your machine's engine and the fuel system were designed and configured to meet the emissions standards required by the laws in your country or region. Dealers, customers, operators, and users are strictly prohibited from tampering with the machine's factory settings. Failure to comply with this rule invalidates the machine's warranty and could result in government fines, legal action, and possible confiscation of the machine until rework to original condition is completed. Engine maintenance and repairs must be done by an authorized technician only.

Product Identification

Your machine and its main components are identified by codes. These codes facilitate identification of your machine. You must give them to your NEW HOLLAND dealer when requesting replacement parts or servicing. The following information indicates where the identification codes are stamped.

Machine identification plate

The plaque with the product identification number (PIN) is located on the inside of the radiator bracket on the left-hand side.

CUIL15TR00484AA 1

The PIN is also stamped on the machine's front axle support bracket.

BRAG12TRLUE1212 2

Engine identification

The engine serial number and date of manufacture are stamped on the right- hand side of engine block **(1)** below the manifold. Record the number below.

Engine Serial No. _____

BRJ4859B 1

NOTE: The engine serial number is repeated on the information plate located on the left side of the engine oil pan.

Further information relating to engine adjustments and emission level compliance are also shown on the engine information plate.

NOTE: The details displayed on the engine information plate may change depending on the country in which the tractor is sold.

SS10K020 2

Component identification - Transmission

The serial number plate **(1)** is located on the right- hand side of the transmission casing behind the battery carrier.

This number is repeated on the vehicle identification plate. Record the information below for quick reference.

Driveline Serial Number. _____

BRJ4857B 1

Cab identification

The Rollover Protective Structure (ROPS) is identified with a plate. The following information is engraved on this plate:

- the machine model
- the maximum weight of the machine
- the plate code
- the Product Identification Number (PIN) of the machine
- the ROPS homologation standard

Diagram of the ROPS identification plate. The plate contains the following text and fields:

- ESTRUTURA DE PROTEÇÃO NO CAPOTAMENTO
- ROLL-OVER PROTECTIVE STRUCTURE
- MARCO DE SEGURIDAD
