Introduction

We want you to be completely satisfied with your new product, so feel free to contact your local Authorized Service Dealer for help with service, genuine replacement parts, or other information you may require.

Whenever you contact your Authorized Service Dealer or the factory, always know the model and serial numbers of your product. These numbers will help the Service Dealer or Service Representative provide exact information about your specific product. You will find the model and serial number plate located in a unique place on the product as shown below.

1. Model and Serial Number Plate

For your convenience, write the product model and serial numbers in the space below.

Model No:

Page

Serial No.

The warning system in this manual identifies potential hazards and has special safety messages that help you and others avoid personal injury, even death. DANGER, WARNING and CAUTION are signal words used to identify the level of hazard. However, regardless of the hazard, be extremely careful.

DANGER signals an extreme hazard that will cause serious injury or death if the recommended precautions are not followed.

WARNING signals a hazard that may cause serious injury or death if the recommended precautions are not followed.

CAUTION signals a hazard that may cause minor or moderate injury if the recommended precautions are not followed.

Two other words are also used to highlight information. "Important" calls attention to special mechanical information and "Note" emphasizes general information worthy of special attention.

The left and right side of the machine is determined by sitting on the seat in the normal operator's position.

FORM NO. 3324-597

48" Dozer Blade Adapter Kit			
INSTALLATION INSTRUCTIONS			
1			

Loose Parts

Note: Use the chart below to identify parts for assembly.

DESCRIPTION	QTY.	USE
Blade Bracket Assembly	1	Select air base and mounting breeket
Rod	1	Select air hose and mounting bracket

IMPORTANT: This kit is for installing dozer blades, built before year 2000, to tractors built in the year 2000.

Removing Existing Blade Bracket

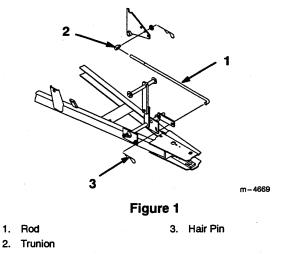

- 1. Remove the existing blade bracket from the dozer assembly (Fig. 2).
- 2. Remove the existing handle latches from the existing blade bracket (Fig. 2).

Removing Rod

- 1. Remove the hair pin that attaches the rod to lift arm (Fig. 1).
- 2. Unthread the rod out of the stud trunion (Fig. 1).

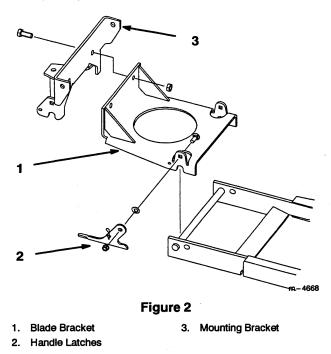

Installing New Rod

- 1. Thread the rod into the stud trunion (Fig. 1).
- 2. Install the hair pin that attaches the rod to lift arm (Fig. 1).

Installing New Blade Bracket

- 1. Install the existing handle latches to the new blade bracket (Fig. 2).
- 2. Install new blade bracket to mounting bracket (Fig. 2).

Installation

Loose Parts

Note: A rear-mount quick attach, which must be purchased separately, is required for this blade. Use the chart below to identify other parts used for assembly.

Note: Skids are available for the blade. They can be useful on rough or broken surfaces to keep the blade above the ground. Contact your authorized Toro dealer for more information.

DESCRIPTION	QTY.	USE	
Blade assembly	1		
Rod	1		
Cotter pin, 1–1/4 in. (30 mm)	1		
Frame assembly	1		
Bolt, 3/4–16 x 3-3/4 in. (95 mm)	1
