---

## ***Section 1: General Information***

The Electronic Service Tool is a laptop computer based service and diagnostic tool that communicates with the vehicle (tractor, combine, implement, etc.) data bus. The Electronic Service Tool will:

- Display the controller software version information.
- Retrieve fault codes stored within controllers.
- Monitor switch and sensor parameter information.
- Download software to controllers.
- Provide a Windows based link to the Engine Diagnostic Tool, Engine Diagnostic Tool Help, and Engine Calibration Download Tool.
- Configure vehicle features relating to the specific model.
- Provide troubleshooting and diagnostic information.

**Section 2: Electronic Service Tool Components**

**Electronic Service Tool**

The Electronic Service Tool consists of the following:

EST522-11

Item Number	Description
Identification Guide - Locations and appearance of some components may vary.	
1	Pouch - Used to Store Various Adapters
2	Laptop Computer AC Power Cord
3	Electronic Service Tool Laptop Computer

Thank you so much for reading.
