LITHO IN THE U.S.A.
ENGLISH

To the Purchaser

This new toolbar was carefully designed and manufactured to give years of dependable service. To keep it operating efficiently, read the instructions in this operator's manual. Each section is clearly identified so you can easily find the information you need—whether it is operation or maintenance. Read "Contents" to learn where each section is located.

 This safety alert symbol identifies important safety messages in this manual. When you see this symbol, be alert to the possibility of personal injury and carefully read the message that follows.

Your operator's manual contains SI Metric equivalents which follow immediately after the U.S. customary units of measure.

Attachments are available to help you do a better job in special conditions. These are described in the operation section of this manual and can be purchased from your John Deere dealer.

"Right-hand" and "left-hand" sides are determined by facing in the direction the toolbar will travel when in use.

Record the size of your toolbar in the space provided on page 23. Your dealer needs this information to give you prompt, efficient service when you order parts or attachments. If your toolbar or attachments require replacement parts, go to your John Deere dealer where you can obtain Genuine John Deere parts—accept no substitutes.

The warranty on this toolbar appears on your copy of the purchase order which you should have received from your dealer when you purchased the toolbar.

TO THE DEALER

Retain Your Shipping Packing List For Complete Shipping Bundle Information.

Pre-delivery service is the service John Deere recommends that a dealer perform on a machine before delivering it to a customer. This includes assembly, lubrication, adjustment, and test. The service assures that the machine will be delivered in good condition to the customer and that the customer will be fully satisfied with its performance right from the start.

The John Deere Delivery Receipt, when properly filled out and signed by the dealer and customer, verifies that the predelivery and delivery services were satisfactorily performed. When delivering this machine, give the customer a copy of the delivery receipt and the operator's manual. Explain their purpose.

PREDELIVERY CHECK LIST

The following check list is a reminder of points to inspect. Check off each item as it is found satisfactory or after proper adjustment is made.

- Inspect to be sure nuts on all bolts have been tightened and all cotter pins spread. See bolt torque chart on Page 19.
- Be sure all grease fittings are lubricated.
- Inflate tires to correct pressure.
- Adjust attachments to row width desired by customer.
- Paint all parts scratched in shipment.
- This toolbar has been thoroughly checked and to the best of my knowledge is ready for delivery to the customer.

DELIVERY CHECK LIST

The following check list is a reminder of very important information which should be conveyed directly to the customer at time toolbar is delivered. Check off each item as it is fully explained to the customer.

- Tell the customer about all the safety precautions that must be observed while using this toolbar.
- When the toolbar is transported on a road or highway at night or during the day, accessory lights and devices should be used for adequate warning to operators of other vehicles. In this regard, tell customer to check local governmental regulations.
- Give the operator's manual to the customer and explain all operating adjustments.
- To the best of my knowledge this toolbar has been delivered ready for field use and customer has been fully informed as to proper care and operation.

Safety Suggestions

GENERAL

 The safety of the operator was one of the prime considerations in the minds of John Deere engineers when this toolbar was designed.

You can make your farm a safer place to live and work if you observe the safety suggestions given. Study these suggestions carefully and insist that they be followed by those working with you and for you.

Finally, remember this: An accident is usually caused by someone's carelessness, neglect, or oversight.

TRANSPORTING

When transporting the toolbar on a road or highway at night or during the day, use accessory lights and devices for adequate warning to operators of other vehicles. In this regard, check local governmental regulations. Various safety lights and devices are available from your John Deere dealer.

Be careful when operating on hillsides because the tractor may tip sideways if it strikes a hole, ditch, or other irregularity.

OPERATION

For tractor stability and operator safety, tractor front end weights may be required. See page 4 under "Front End Weighting."

Do not adjust the toolbar while it is in motion.

Never permit any person other than the operator on the tractor or permit others to ride on the toolbar.

Always lower the support stands, when toolbar is so equipped, before unhitching from the tractor.

On toolbars equipped with flexible linkage, lock the linkage before detaching toolbar from tractor. Be sure to place lock pin in working position after attaching toolbar to tractor.

When servicing toolbar, block toolbar in raised position. Be sure rockshaft and remote cylinder operating levers are not bumped or touched by anyone.

If spray can paint is used for protecting bottoms, sweeps, or disks to be put in storage, be careful when discarding empty can. Do not incinerate or puncture can.
