### 6650, 6750, 6850 and 6950 Self-Propelled Forage Harvesters (From Serial No. 504341)

John Deere Werke Zweibrücken OMZ92839 Issue K9

North American Version
LITHO IN U.S.A.
ENGLISCH

Page	Page
Identification Views	Automatic kernel processor roll clearance 20-28  Manual kernel processor roll clearance 20-28  ROW-TRAK control unit 20-29
<b>Safety</b> General	Area counter
Service	Lighting System and Signals
Safety Decals	Parking lights/low-beam headlights
Controls and Instruments	Work lights
General view	Hazard warning lights
Multi-function lever	Operator's Cab
Corner post	Operator's seat
Roof console	Lumbar support
Automatic function control	Seat-belt
Steering column	Left-hand armrest
Switch console — functions	Right-hand armrest
Multi-function lever — functions 15-20	Ashtray
Roof switch console — functions 15-23	Air-comfort seat
Steering column — functions 15-24	Storage compartment for Operator's
	Manuals
Warning Devices and Monitors	Auxiliary power outlet
Indicator lights I	Cooling compartment
Indicator lights II	Steering column
Fuel gauge	Foot brakes
Coolant temperature gauge 20-9	Parking brake
Automatic function control lights 20-10	Releasing parking brake
Infotrak monitor	Hitch control
Input of specific machine data 20-15	Sun visor
Software version 20-15	Inside mirror
Cutterhead alarm speed 20-18	Outside mirror
SERVICE information 20-19	Adjustable air louvers
Automatic function control 20-20	Radio and CB radio
Sharpening cycles 20-21	
Automatic knife sharpening 20-22	Pre-Starting Checks
Sharpening stone home position (manual) 20-24	Daily checks
Automatic stationary knife adjustment 20-24	Engine oil level
Manual stationary knife adjustment 20-26	
Kernel processor roll clearance 20-27	Continued on next page

## **Identification Views**

-UN-20AUG97

ZX,OMSPFH,TYP01-19-01NOV97

### **Safety**

#### RECOGNIZE SAFETY INFORMATION

This is the safety-alert symbol. When you see this symbol on your machine or in this manual, be alert to the potential for personal injury.

Follow recommended precautions and safe operating practices.

DX,ALERT

-19-29SEP98

T81389

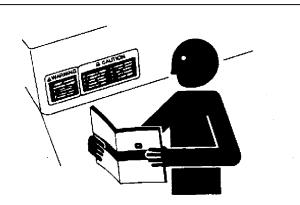

#### **FOLLOW SAFETY INSTRUCTIONS**

Carefully read all safety messages in this manual and on your machine safety signs. Keep safety signs in good condition. Replace missing or damaged safety signs. Be sure new equipment components and repair parts include the current safety signs. Replacement safety signs are available from your John Deere dealer.

Learn how to operate the machine and how to use controls properly. Do not let anyone operate without instruction.

Keep your machine in proper working condition. Unauthorized modifications to the machine may impair the function and/or safety and affect machine life.

If you do not understand any part of this manual and need assistance, contact your John Deere dealer.

X,READ

-19-03MAR9

#### **UNDERSTAND SIGNAL WORDS**

A signal word—DANGER, WARNING, or CAUTION—is used with the safety-alert symbol. DANGER identifies the most serious hazards.

DANGER or WARNING safety signs are located near specific hazards. General precautions are listed on CAUTION safety signs. CAUTION also calls attention to safety messages in this manual.

**A WARNING** 

**ACAUTION** 

DX.SIGNAL

-19-03MAR9

TS187

30010

#### **OBSERVE ROAD TRAFFIC REGULATIONS**

Always observe local road traffic regulations when using public roads.

FX,ROAD

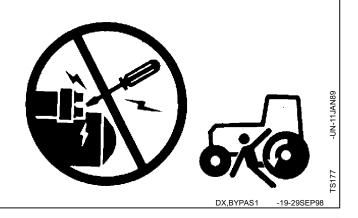

-19-01MAY91

#### PREVENT MACHINE RUNAWAY

Avoid possible injury or death from machinery runaway.

Do not start engine by shorting across starter terminals. Machine will start in gear if normal circuitry is bypassed.

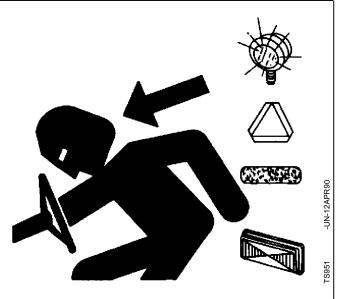

NEVER start engine while standing on ground. Start engine only from operator's seat, with transmission in neutral or park.

### **USE SAFETY LIGHTS AND DEVICES**

Prevent collisions between other road users, slow moving tractors with attachments or towed equipment and self-propelled machines on public roads. Frequently check for traffic from the rear, especially in turns, and use turn signal lights.

Use headlights, flashing warning lights, and turn signals day and night. Follow local regulations for equipment lighting and marking. Keep lighting and marking visible, clean, and in good working order. Replace or repair lighting and marking that has been damaged or lost. An implement safety lighting kit is available from your John Deere dealer.

DX,FLASH

9-0730199

#### HANDLE FUEL SAFELY—AVOID FIRES

Handle fuel with care: it is highly flammable. Do not refuel the machine while smoking or when near open flame or sparks.

Always stop engine before refueling machine. Fill fuel tank outdoors.

Prevent fires by keeping machine clean of accumulated trash, grease, and debris. Always clean up spilled fuel.

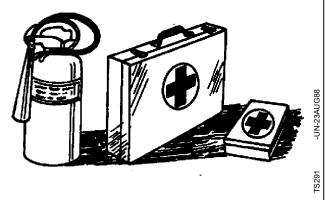

#### PREPARE FOR EMERGENCIES

Be prepared if a fire starts.

Keep a first aid kit and fire extinguisher handy.

Keep emergency numbers for doctors, ambulance service, hospital, and fire department near your telephone.

DX,FIRE2 -19-03MAR93

#### HANDLE STARTING FLUID SAFELY

Starting fluid is highly flammable.

Keep all sparks and flame away when using it. Keep starting fluid away from batteries and cables.

To prevent accidental discharge when storing the pressurized can, keep the cap on the container, and store in a cool, protected location.

Do not incinerate or puncture a starting fluid container.

-UN-18MAR92

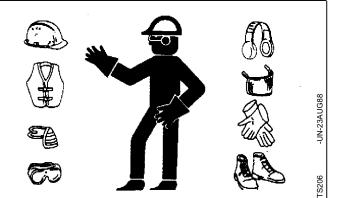

#### WEAR PROTECTIVE CLOTHING

Wear close fitting clothing and safety equipment appropriate to the job.

Prolonged exposure to loud noise can cause impairment or loss of hearing.

Wear a suitable hearing protective device such as earmuffs or earplugs to protect against objectionable or uncomfortable loud noises.

Operating equipment safely requires the full attention of the operator. Do not wear radio or music headphones while operating machine.

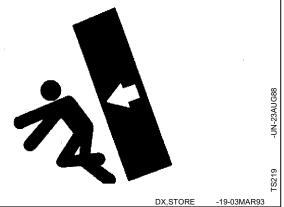

DX,WEAR

-19-10SEP90

#### STORE ATTACHMENTS SAFELY

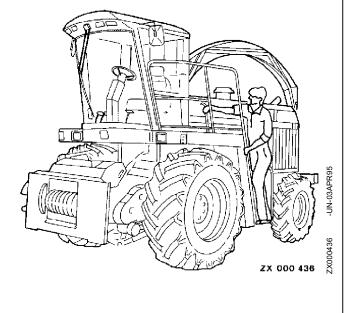

Stored attachments such as dual wheels, cage wheels, and loaders can fall and cause serious injury or death.

Securely store attachments and implements to prevent falling. Keep playing children and bystanders away from storage area.

#### MOUNT AND DISMOUNT SAFELY

Use handrail when mounting or dismounting the harvester.

ZX,HANDLE

-19-01OCT91

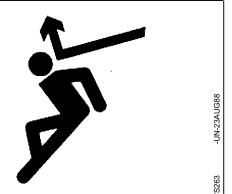

#### **OPERATE FORAGE HARVESTER SAFELY**

All machinery should only be operated by persons who have been properly instructed.

Never stand in the path of discharge spout while cutterhead and fan are turning.

Never open cutterhead or fan housing doors while cutterhead is turning.

Always operate machine at rated engine speed.

ZX,CAUTIONUS -19-01MAR93

#### **WEAR SEAT-BELT**

The machine operator and passenger should wear the seat-belt all times.

-19-01DEC96 ZX,SEATBELT

#### **KEEP RIDERS OFF THE MACHINE**

Only allow the operator and one rider in the operator's station.

Other riders are subject to injury such as being thrown off the machine and obstruct the operator's view resulting in the machine being operated in an unsafe manner.

One rider is permitted, since the machine is equipped with a factory-approved passenger seat.

PN=9

ZX,PASSENGERUS -19-01MAR93

05-5

#### DRIVING THE FORAGE HARVESTER

Operate machine only when all guards are correctly installed.

Before moving away, always check immediate vicinity of machine (e.g. for children). Ensure adequate visibility. Use the horn as a warning immediately before moving away.

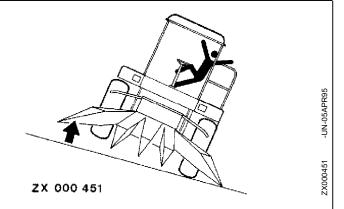

Always adapt ground speed to road or field conditions. Avoid making sharp turns when driving up or down slopes or when driving across a slope.

Attach harvesting units and other implements to forage harvester with extreme care.

When making turns, always take into consideration the width of the attachment and the fact that the rear end of the forage harvester swings out. Attachments and ground conditions affect the driving characteristics of the harvester.

Reduce ground speed when driving on slopes or over uneven ground and before making sharp turns. Before descending a steep hill, shift to a lower gear.

Avoid holes, ditches and obstructions which may cause the forage harvester to tip, particularly on hillsides.

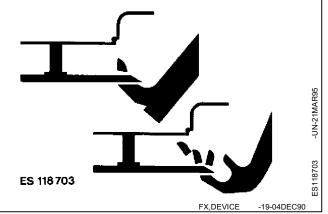

ZX,DRIVE -19-02OCT91

#### **GUARDS AND SHIELDS**

Keep guards and shields in place at all times. Ensure that they are serviceable and installed correctly.

Always disengage main clutch, shut off engine and remove key before removing any guards or shields.

Keep hands, feet and clothing away from moving parts.

#### STAY CLEAR OF HARVESTING UNITS

Cutterbar, auger, reel and feed rolls cannot be completely shielded due to their function. Stay clear of these moving elements during operation. Always disengage main clutch, shut off engine and remove key before servicing or unclogging machine.

ES118704

CUT -19-21DEC90

#### **KEEP HANDS AWAY FROM KNIVES**

Never attempt to clear obstructions in front of or on harvesting unit unless main clutch is disengaged, engine shut off and key removed.

Everyone must be clear of the forage harvester before starting the engine.

FX,KNIFE -1

-19-21DEC90

#### STAY CLEAR OF ROTATING DRIVELINES

Entanglement in rotating driveline can cause serious injury or death.

Keep tractor master shield and driveline shields in place at all times. Make sure rotating shields turn freely.

Wear close fitting clothing. Stop the engine and be sure PTO driveline is stopped before making adjustments, connections, or cleaning out PTO driven equipment.

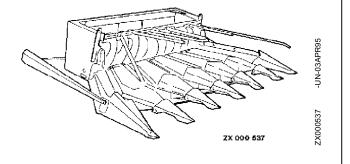

X,PTO

-19-12SEP95

#### AVOID ENTANGLEMENT

To avoid entanglement, do not feed crop into machine by hand or attempt to manually unplug machine while it is running. The feed rolls can feed crop material in faster than you can release your grip on the material.

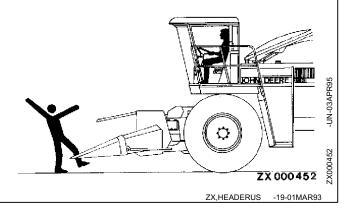

ZX,FEEDROLL -19-04

#### TRANSPORT WITH HARVESTING UNIT **INSTALLED**

Before driving forage harvester on public roads, harvesting unit must be raised. It must not, however, obstruct the operator's view of the road.

#### **BALLASTING FOR SAFE GROUND CONTACT**

Operating, steering and braking performance of forage harvester can be considerably affected by attachments which alter the center of gravity of the machine. To maintain safe ground contact, ballast the harvester at the rear end as necessary. Observe the maximum permissible axle loads and total weights.

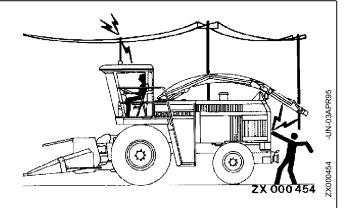

ZX,WEIGHT -19-02OCT91

#### **AVOID POWER LINES**

If radio aerial and CB aerial (optional) are not secured in transport position before driving on public roads, they may come into contact with low-hanging electrical cables. This could result in the operator suffering a severe electrical shock.

To avoid electrical shock, no portion of the machine should be higher than 4 m (13 ft).

Before transporting machine, lower aerial or remove it.

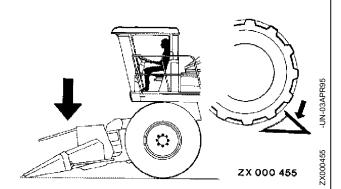

### PARKING AND LEAVING THE FORAGE HARVESTER

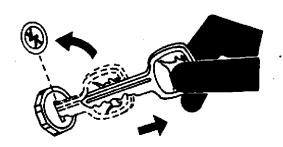

Lower harvesting unit to the ground.

Before leaving the forage harvester, disengage main clutch and shut off engine. Move gear shift lever to neutral, apply parking brake, remove key and lock the operator's cab.

Never leave forage harvester unattended as long as engine is running.

Never leave the operator's cab when driving.

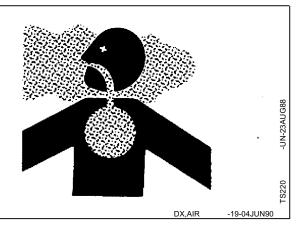

ZX,PARKUS -19-01JAN93

#### **WORK IN VENTILATED AREA**

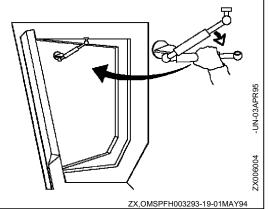

Engine exhaust fumes can cause sickness or death. If it is necessary to run an engine in an enclosed area, remove the exhaust fumes from the area with an exhaust pipe extension.

If you do not have an exhaust pipe extension, open the doors and get outside air into the area.

#### **EMERGENCY EXIT**

The right-hand cab window may be used as an emergency exit. Disengage the gas-filled spring on the sidewall of the cab and open the window.

ZX 006004

#### PRACTICE SAFE MAINTENANCE

Understand service procedure before doing work. Keep area clean and dry.

Never lubricate, service, or adjust machine while it is moving. Keep hands, feet , and clothing from power-driven parts. Disengage all power and operate controls to relieve pressure. Lower equipment to the ground. Stop the engine. Remove the key. Allow machine to cool.

Securely support any machine elements that must be raised for service work.

Keep all parts in good condition and properly installed. Fix damage immediately. Replace worn or broken parts. Remove any buildup of grease, oil, or debris.

On self-propelled equipment, disconnect battery ground cable (-) before making adjustments on electrical systems or welding on machine.

On towed implements, disconnect wiring harnesses from tractor before servicing electrical system components or welding on machine.

**S218** 

DX,SERV

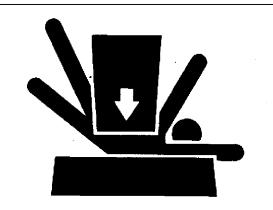

-19-04FEB99

#### SUPPORT MACHINE PROPERLY

Always lower the attachment or implement to the ground before you work on the machine. If you must work on a lifted machine or attachment, securely support the machine or attachment. If left in a raised position, hydraulically supported devices can settle or leak down.

Do not support the machine on cinder blocks, hollow tiles, or props that may crumble under continuous load. Do not work under a machine that is supported solely by a jack. Follow recommended procedures in this manual.

When implements or attachments are used with a tractor, always follow safety precautions listed in the implement operator's manual.

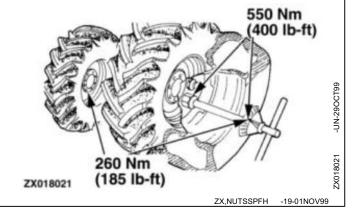

DX,LOWER

.....

#### **RETORQUE WHEEL NUTS**

Retorque wheel nuts as specified in Sections "Wheels and Ballast" and "Lubrication, Periodic Services". Failure to do this could result in a wheel falling off during operation, causing the machine to tip over with serious injury to the operator and extensive damage to the machine.

#### **AVOID HIGH-PRESSURE FLUIDS**

Escaping fluid under pressure can penetrate the skin causing serious injury.

Avoid the hazard by relieving pressure before disconnecting hydraulic or other lines. Tighten all connections before applying pressure.

Search for leaks with a piece of cardboard. Protect hands and body from high pressure fluids.

If an accident occurs, see a doctor immediately. Any fluid injected into the skin must be surgically removed within a few hours or gangrene may result. Doctors unfamiliar with this type of injury should reference a knowledgeable medical source. Such information is available from Deere & Company Medical Department in Moline, Illinois, U.S.A.

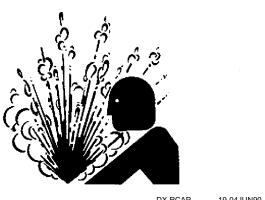

DX,FLUID -19-03MAR93

#### SERVICE COOLING SYSTEM SAFELY

Explosive release of fluids from pressurized cooling system can cause serious burns.

Shut off engine. Only remove filler cap when cool enough to touch with bare hands. Slowly loosen cap to first stop to relieve pressure before removing completely.

DX,RCAP

-04001100

#### **DISPOSE OF WASTE PROPERLY**

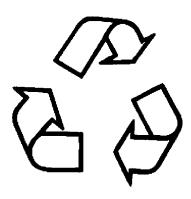

Improperly disposing of waste can threaten the environment and ecology. Potentially harmful waste used with John Deere equipment include such items as oil, fuel, coolant, brake fluid, filters, and batteries.

Use leakproof containers when draining fluids. Do not use food or beverage containers that may mislead someone into drinking from them.

Do not pour waste onto the ground, down a drain, or into any water source.

Air conditioning refrigerants escaping into the air can damage the Earth's atmosphere. Government regulations may require a certified air conditioning service center to recover and recycle used air conditioning refrigerants.

Inquire on the proper way to recycle or dispose of waste from your local environmental or recycling center, or from your John Deere dealer.

DX,DRAIN -19-03MAR93

### **Safety Decals**

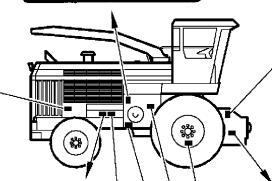

Avoid bodily injury from rotating engine fan: Keep hands out of fan discharge area when engine is running.

#### **DANGER**

Start only from seet in park or neutral. Starting in gear kills.

### **WARNING**

AVOID BODILY INJURIES FROM ROTATING KNIVES

KEEP HANDS DUT OF KNIFE AREA WHEN CUTTER HEAD IS TURNING

### DANGER/POISON

SHIELD EYES EYES EXPLOSIVE GASES CAN CAUSE BUINDNESS OR INJURY

5PARKS FLAMES SMOKING

SULFURIC ACID CAN CAUSE BLINDNESS OR SEVERE BURNS

IMMEDIATLY WITH WATER GET MEDICAL HELP FAST

KEEP OUT OF THE REACH OF CHILDREN, DO NOT TIP, KEEP YENT CAPS TIGHT AND LEVEL

# WARNING

Components behind guards or access doors in this area may rotate, possibly several minutes, after power is shut off.

To avoid bodily injury:

- Look and listen for evidence of rotation. Do not open or remove guard or access door until all components have stopped.

BOOSTER CABLE INSTRUCTIONS

2. CONNECT ONE END OF OTHER CABLE TO NEGATIVE (-) TERMINAL OF THE BOOSTER BATTERY

1. ON A NEGATIVE GROUNDED SYSTEM
CONNECT ENDS OF ONE CABLE TO POSITIVE (+)
TERMINAL OF EACH BATTERY

3. CONNECT THE OTHER END OF THE CABLE,
AWAY FROM THE BATTERY, TO THE ENGINE BLOCK,
FRAME, OR SOME OTHER GOOD METALLIC GROUND

4. REVERSE PROCEDURE WHEN DISCONNECTING

### **IMPORTANT**

TORQUE WHEEL BOLTS TO 400 LB-FT (950 NM) RETORQUE AT LEAST ONCE AFTER ONE HOUR OF OPERATION EACH TIME THE WHEEL IS REPOSITIONED EACH NEW WHEEL MUST ALSO BE RETORQUED

### A WARNING

AVOID BODILY INJURIES FROM HYDRAULIC OIL AND GAS UNDER PRESSURE.

BEFORE REMOVING, DISASSEMBLING OR CHARGING ACCUMULATOR

- SWITCH IGNITION ON WITHOUT STARTING ENGINE ACTUATE SLOWLY MAIN SWITCH FOR 25 ON/OFF CYCLES TO RELIEF SYSTEM HYDRAULIC PRESSURE SWITCH IGNITION OFF

USE ONLY DRY NITROGEN FOR RECHARGING ACCUMULATOR SEE YOUR JOHN DEERE DEALER.

### **A WARNING**

AVOID BOOILY INJURIES FROM HYDRAULIC OIL AND GAS UNDER PRESSURE.

BEFORE REMOVING, DISASSEMBLING OR CHARGING ACCUMULATOR:

- SWITCH ENGINE AND DEPRESS SWITCHES FOR HEADER DOWN AND FLOTATION DISCHARGING SIMULTANEOUSLY FOR 5 SECOND AFTER ROLLFRIDX OR HEADER IS ON THE GROUND OR IN A SUPPORTED POSITION TO RELIEF SYSTEM HYDRAULG PRESSURE.
- USE ONLY DRY NITROGEN FOR RECHANGING ACCUMULATOR. SEE YOUR JOHN DEERE DEALER.

-UN-20AUG97 ZX012542

Be Safe--Avoid Bodily injury

Before operating machine, add rear ballast as specified in Operator's Manual. Failure to add proper amount of ballast can result in vehicle instability and loss of steering control.

Avoid bodily injury from rotating engine fan: Keep hands out of fan discharge area when engine is running.

### DANGER!

ROTATING KNIVES CAN CAUSE SERIOUS INJURY OR DEATH.

NEVER OPERATE ENGINE WITH FEEDROLL HOUSING OPEN.

### **IMPORTANT**

TORQUE WHEEL BOLTS TO 400 LB-FT (550 NM) RETORQUE AT LEAST ONCE AFTER ONE HOUR OF OPERATION EACH TIME THE WHEEL IS REPOSITIONED EACH NEW WHEEL MUST ALSO BE RETORQUED

\*\*

## **A** CAUTION

#### TO AVOID SERIOUS PERSONAL INJURY:

NEVER SEARCH FOR DETECTED METAL UNTIL YOU

- 1. DISENGAGE ALL DRIVES,
- SHUT OFF THE ENGINE AND IGNITION SWITCH.
- WAIT FOR ALL PARTS TO STOP MOVING.

## CAUTION

- 1. Keep all shields in place.
- 2. Disengage and shut off all engine and/or motor power before servicing or unclogging machine.
- 3. Keep hands, feet, and clothing away from powerdriven parts.

**‡**}

### **A WARNING**

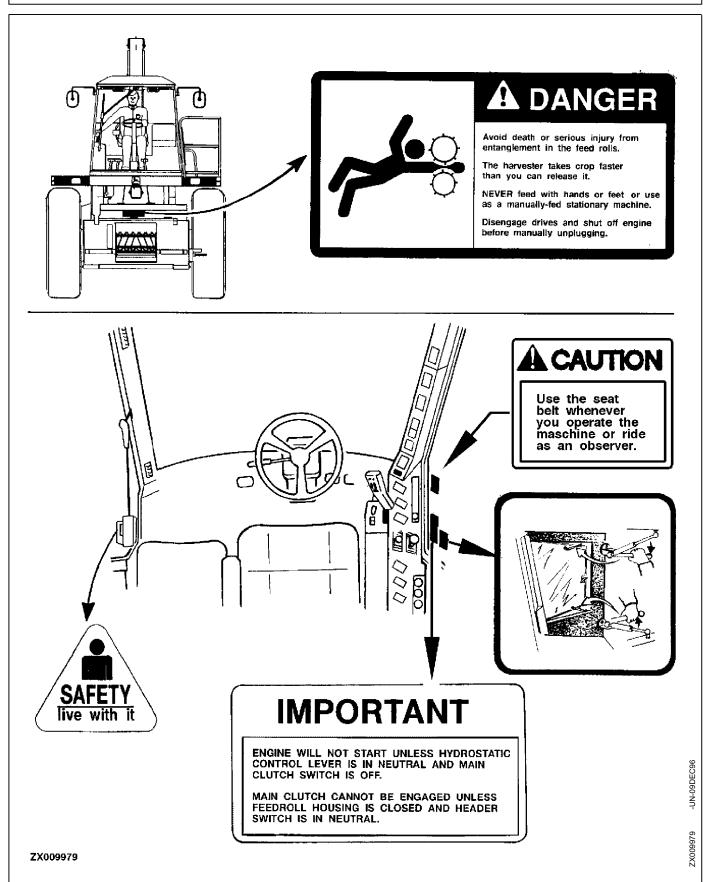

AVOID BODILY INJURIES FROM HYDRAULIC OIL AND GAS UNDER PRESSURE. BEFORE REMOVING, DISASSEMBLING OR CHARGING ACCUMULATOR:

- SWITCH ENGINE AND DEPRESS SWITCHES FOR HEADER DOWN AND FLOTATION DISCHARGING SIMULTANEOUSLY FOR 5 SECOND AFTER POLLERBOX OR HEADER IS ON THE GROUND OR IN A SUPPORTED POSITION TO RELIEF SYSTEM HYDRAULIC PRESSURE.

USE ONLY DRY NITROGEN FOR RECHARGING ACCUMULATOR. SEE YOUR JOHN DEERE DEALER.
